

Selam arkadaslar burada sizlere mp4 yapimini anlatmaya calisacagim...

Oncelikle bize lazim olan program Nero 7 dir. Neronun icerisinde Nero recode diye bir program var

Elimizde bulunan kaliteli divx leri (baska media larda olabilir) convert etmeye basliyoruz.

yukaridaki resimde gordugumuz programi acip renkli olan kisimdaki bolumu tikliyoruz...

Simdi reside gordugumuz gibi

1. nero digital AVC

2. Standart AVC yi seciyoruz.

3. 287 MB yaziyoruz...(fazla veya az secim sizin) siteye bu sekil atiyorum genelde

4. sira filmi eklemeye geldi. importeren dan filmi seciyoruz.

5. Gelen ekrandaki filmi iki tikliyoruz

6. Arka tarafta goruyoruz (7. iki tikladiktan sonra bir 10 saniye bekleyip gelmedigini goruseniz kapat duymesine basin o yerine gelmis olacaktir)

Mijn Nero Digital Disc

DVD-elementen importeren en videokwaliteit, audio-track en ondertitel selecteren.

The screenshot shows the Nero Recode software interface. At the top, there's a blue header with the Nero Recode logo. Below it, the title 'Mijn Nero Digital Disc' is displayed, followed by a subtitle: 'DVD-elementen importeren en videokwaliteit, audio-track en ondertitel selecteren.' The main window is divided into several sections. On the left, there's a 'Nero Digital titels' tab and a 'Databestanden' tab. Below these, a table lists the content of the disc. The table has columns for 'Inhoud', 'Duur', 'Grootte', and 'Videokwaliteit'. The first row shows 'Mijn schijf' with a yellow smiley icon, and the second row shows 'nedivx-10aw-cd1' with a duration of '00:58.13', a size of '287 MB', and a video quality of '551,3Kbps'. To the right of the table, there's a vertical toolbar with icons for 'Importeren', 'Verwijderen', 'Vergrendelen', 'Film inkorten', 'Hoofdstukken', and 'Nero Digital video'. Below the table, there's a 'Videokwaliteit' slider and a 'Totale grootte' indicator. In the center, there's a 'Nero Digital Audio coderen:' section with two radio buttons: 'Stereo' and '5.1-kanal surround'. The '5.1-kanal surround' option is selected and has a large number '2' next to it. To the right of this section, there's an 'Instellingen...' button with a speaker icon and a tooltip that says 'Geavanceerde audio-instellingen.'. At the bottom, there's a progress bar showing the total size of the disc, ranging from 0MB to 300MB. The progress bar is currently at approximately 287MB. There are also buttons for 'Meer >>' and 'Terug'.

Inhoud	Duur	Grootte	Videokwaliteit
Mijn schijf			
nedivx-10aw-cd1	00:58.13	287 MB	551,3Kbps

1. Burada görüntü kalitesinin her filmde farklı olduğunu göreceksiniz o da filmin divx in kalitesine göre değişecektir.

2. Burada 5.1 i seçerseniz filmin convertte görüntü kalitesinin düşeceği anlamına gelir ama ses daha kaliteli olur.

3. Devama basıyoruz.

Devamını ise resimlerde gördüğünüz şekilde yapınız
